Background

ADEX Corporation Ltd. was established in 1982.

Nature of Business

Adex Corporation Ltd, is an engineering company designing, manufacturing & marketing of electrical equipment for :

1. Power Distribution
2. High, medium & low voltage power switching, transmission and distribution
3. Medium & low voltage power distribution including a) busway system & b) transformers
4. Protection, automation, metering & measurement (PAMM) - power management system
5. Industrial & public lighting system
6. Construction of factory building & real estate

Its activity now ranges from 230kV down to the low voltage machine connections with two manufacturing plants with HV & LV testing laboratory. The manufacturing ranges include MV & LV switchgears, 33 & 11 kV vacuum circuit breakers, power and distribution transformer up to 33 kV & 50 MV. The design department is enriched with special design software & skilled design engineers for product design and for a complete engineering study of HV, MV & LV system in accordance with IEC & relevant standards/regulations. It is equipped with manufacturing and testing facilities compliment ISO-9001:2015. Adex Corporation represents Schneider Electric Industries SA of France and SQ Electric for marketing the group's products in Bangladesh. Adex also introduce their own branded CLB as Nirapod. for Last 10 years.
